Next scheduled column can have 4 different types of values depending on how the frequency was setup (see next page to understand how it is setup):

1. The next scheduled date and time
2. The next scheduled date and time PLUS Run Now link
3. Only Run Now
4. If the profile has been made inactive then Inactive will be shown

If the user does not have the rights to Add and edit those buttons will be disabled.

If an Export is currently running then All the 'Run Now' links will be disabled
